

Energy Cost, Sourcing, and Reliability in New Hampshire — Appendices

Long-form detail behind the legislative brief. 460 bills found for 2020–2026 (certified against the complete bill universe); 375 policy bills carry the headline numbers.

CONTENTS

Appendix A — Every bill in the set — Every bill: plain topic, theme, result, relevance tier

Appendix B — Theme scorecards and history baskets — Theme scorecards with baskets and stop patterns

Appendix C — Roll-call votes and support — Every floor roll call with party splits; high-support non-enactments

Appendix D — Sponsors and people — Sponsors and people

Appendix E — Where each bill ended — Where each policy bill ended, from official dockets

Appendix F — What this data can and cannot say — What this data can and cannot say

Appendix G — Bill-by-bill grid: sponsors, chamber votes, governor — Bill-by-bill grid: sponsors, chamber votes, governor

Appendix H — Inside the budget trailer (HB2) — Energy sections inside HB2 (2021, 2023, 2025) with whole-bill votes

Appendix I — Sources and review notes — Claim-to-source mapping, collection notes, certifications, review status

Votes on HB2 (Appendix H) are on the whole budget trailer, never on a single section. Discovery is certified against the complete OpenStates bulk universe (2020–2024) and the complete official SQL legislation table (2025–2026).

Appendix A — Every bill in the set

One row per bill found by the energy search, 2020–2026. ‘Tier’ marks how central the bill is: core (energy policy), adjacent (touches the issue), or context (found by the keywords but not an energy bill; kept for audit and excluded from headline counts). Results come from official dockets and chaptered texts; Appendix E has each bill’s path.

Year	Bill	Plain topic	Theme	Result	Tier
2020	HB1116	Would have changed the definition of “eligible facility” as it pertains to renewable generation to provide fuel diversity.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	HB1146	Would have changed the duties of the site evaluation committee.	Energy facility siting and decommissioning	Did not pass	core
2020	HB1210	Would have created a property tax exemption for energy storage systems.	Energy taxation and host-community revenue	Did not pass	core
2020	HB1215	Would have changed the installation of solar energy systems in condominiums and homeowner associations; interim study.	Net metering, community power, and local generation	Interim study	adjacent
2020	HB1218	Would have changed net energy metering limits for customer generators and the purchase of output of limited electrical energy producers.	Net metering, community power, and local generation	Did not pass	core
2020	HB1225	Would have allowed increased net energy metering limits for municipal hydroelectric facilities.	Net metering, community power, and local generation	Did not pass	core
2020	HB1228	Climate Change Awareness Day proclamation; a commemorative day, not energy policy.	—	Did not pass	context
2020	HB1229	Would have required proposed natural gas facilities to include decommissioning costs.	Energy facility siting and decommissioning	Did not pass	core
2020	HB1237	Would have created a committee to study the requirements of reporting by utility companies of information required for valuation of	Energy taxation and host-community revenue	Did not pass	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2020	HB1261	certain utility property for purposes of RSA 72. Would have changed the energy consumption reduction goal.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2020	HB1262	Would have changed the purchase of output of limited electrical energy producers; interim study.	Net metering, community power, and local generation	Interim study	core
2020	HB1301	Would have created a committee to study applications of microgrids in electricity supply.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2020	HB1317	Would have changed funding for energy efficiency and renewable energy projects by residential, commercial, and industrial ratepayers.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2020	HB1355	Would have created a committee to study energy efficiency programs.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2020	HB1364	Would have changed payments to the public utilities commission in lieu of meeting renewable portfolio standards for biomass.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	HB1365	Would have repealed the energy efficiency and sustainable energy board.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2020	HB1366	Would have changed the computation of renewable energy credits.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	HB1370	Would have changed baseload renewable generation credits for biomass energy facilities; interim study.	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2020	HB1382	Solar Eclipse Day proclamation; 'solar' false positive.	—	Did not pass	context
2020	HB1396	Would have changed notice required for the termination of	Electric rates, bills, and ratepayer costs	Did not pass	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2020	HB1402	service of a public utility. Would have created procedures for municipal host customer-generators of electrical energy; interim study.	Net metering, community power, and local generation	Interim study	core
2020	HB1405	Would have changed the installation of wireless electric utility meters.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	adjacent
2020	HB1406	Would have changed the property tax exemptions for solar and wind-powered energy systems.	Energy taxation and host-community revenue	Did not pass	core
2020	HB1418	Would have authorized funds of the department of agriculture to be used for increasing farm energy efficiency; interim study.	Energy efficiency, weatherization, and fuel assistance	Interim study	adjacent
2020	HB1429	Would have changed integrated distribution plans of energy utilities; interim study.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Interim study	core
2020	HB1430	Would have created a commission to study attainment of a clean-energy electric grid by 2030.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2020	HB1444	Would have required the adoption of vehicle emissions standards based on the California clean car standards.	Climate, emissions, and RGGI	Did not pass	adjacent
2020	HB1478	Would have repealed the law on preservation and use of renewable generation to provide fuel diversity.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	HB1479	Would have changed municipal energy commissions.	Net metering, community power, and local generation	Did not pass	adjacent
2020	HB1480	Would have changed the use of system benefits charges.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2020	HB1481	Would have changed the net metering cap for customer-generators.	Net metering, community power, and local generation	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2020	HB1496	Would have changed the regional greenhouse gas initiative cap and trade program for controlling carbon dioxide emissions.	Climate, emissions, and RGGI	Did not pass	core
2020	HB1503	PFAS air-emissions study; environmental health, not energy.	—	Did not pass	context
2020	HB1515	Would have changed group host net energy metering.	Net metering, community power, and local generation	Did not pass	core
2020	HB1518	Would have changed the alternative compliance payments for renewable energy obligations not met through the purchase of renewable energy credits.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	HB1519	Would have created a committee to study class IV resources under the renewable portfolio standard.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	HB1535	Would have changed installation of solar photovoltaic energy systems by owners subject to deed restrictions in a homeowners association.	Net metering, community power, and local generation	Did not pass	adjacent
2020	HB1541	Would have changed including electrical storage facilities in the definition of energy facility.	Energy facility siting and decommissioning	Did not pass	core
2020	HB1604	Agricultural registration for utility terrain vehicles; ‘utility’ false positive.	—	Did not pass	context
2020	HB1612	Utility terrain vehicle road rules; ‘utility’ false positive.	—	Did not pass	context
2020	HB1620	Would have changed electric vehicle parking spaces.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2020	HB1631	Would have changed taxation of certain hydro-electric generation facilities.	Energy taxation and host-community revenue	Did not pass	core
2020	HB1635	Climate education in schools; education policy (in the public-	—	Interim study	context

Year	Bill	Plain topic	Theme	Result	Tier
2020	HB1664	education packet's universe). Would have created a climate action plan, an office of the environmental advocate, and an oversight commission on environmental services.	Climate, emissions, and RGGI	Did not pass	core
2020	HB1684	Would have created an energy conservation program and an energy conservation project fund and establishing the state PACE reserve fund.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2020	HB412	Would have created a committee to study the long-term consequences of decommissioning nuclear power plants.	Nuclear power	Did not pass	core
2020	HB466	Would have raised the customer-generator capacity cap for net metering eligibility; vetoed.	Net metering, community power, and local generation	Vetoed	core
2020	HB568	Would have changed the New Hampshire energy strategy.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2020	HB704	Would have changed the storage of nuclear waste.	Nuclear power	Did not pass	core
2020	HB715	Set the framework for electrical energy storage installed by customers, keeping storage behind the meter exempt from utility regulation (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2020	HB735	Would have changed carbon pricing.	Climate, emissions, and RGGI	Did not pass	core
2020	SB122	Would have redirected expenditures from the RGGI energy efficiency fund; vetoed.	Energy efficiency, weatherization, and fuel assistance	Vetoed	core
2020	SB124	Would have raised the minimum electric	Renewable generation and the	Vetoed	core

Year	Bill	Plain topic	Theme	Result	Tier
2020	SB13	renewable portfolio standards; vetoed. Would have changed limited electrical energy producers and net energy metering.	RPS: solar, wind, hydro, biomass Net metering, community power, and local generation	Did not pass	core
2020	SB159	Would have raised net energy metering limits for customer-generators (the 2020 5-megawatt bill); vetoed.	Net metering, community power, and local generation	Vetoed	core
2020	SB166	Aligned competitive electricity supplier requirements with net energy metering rules (became law). Would have required emergency generators in certain senior housing - backup power for outages; interim study.	Net metering, community power, and local generation	Became law	core
2020	SB256	Would have changed the property tax exemption for solar energy systems.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Interim study	adjacent
2020	SB424	Would have created the New Hampshire youth climate and conservation council.	Energy taxation and host-community revenue	Did not pass	core
2020	SB427	Would have studied regional plastic-to-oil conversion plants - waste-derived fuel production.	Climate, emissions, and RGGI	Did not pass	adjacent
2020	SB429	Would have changed state energy management.	Fuels: natural gas, propane, and heating oil	Did not pass	adjacent
2020	SB462	Would have changed aggregation of electric utility customers.	Energy efficiency, weatherization, and fuel assistance	Did not pass	adjacent
2020	SB463	Would have changed the electric renewable portfolio standard.	Net metering, community power, and local generation	Did not pass	core
2020	SB492	Would have changed the public utilities commission estimates of electricity production for customer-sited sources that are net metered and for	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	SB494		Net metering, community power, and local generation	Did not pass	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2020	SB495	which renewable energy certificates are not issued. Would have changed biodiesel in class I electric renewable energy.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2020	SB497	Would have changed the class IV hydroelectric requirement under electric renewable portfolio standards.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	SB498	Would have changed customer electrical energy storage.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2020	SB499	Would have required the public utilities commission to establish electric utility performance incentives and penalty mechanisms.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2020	SB518	Would have changed group host net energy metering for low-income community solar projects, limited electrical energy producers storage systems and private sector sales, outdoor lighting policies, and aggregation of electric utility customers.	Net metering, community power, and local generation	Did not pass	core
2020	SB530	Would have changed property tax exemptions for renewable energy systems.	Energy taxation and host-community revenue	Did not pass	core
2020	SB583	Climate science in the adequate-education criteria; education policy.	—	Did not pass	context
2020	SB587	Would have changed the duties and membership of the energy efficiency and sustainable energy board.	Energy efficiency, weatherization, and fuel assistance	Did not pass	adjacent
2020	SB590	Would have created a committee to develop science-based emissions reduction goals for	Climate, emissions, and RGGI	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2020	SB594	the state of New Hampshire. Speech-pathologist certification; 'electrical physical agent modalities' false positive.	—	Did not pass	context
2020	SB603	Would have changed financial assistance for biomass and forest product workers.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2020	SB610	Would have created a committee to evaluate the Transportation Climate Initiative memorandum of understanding and associated modeling and scenarios.	Climate, emissions, and RGGI	Did not pass	core
2020	SB626	Would have decreased the fee to file a petition for a declaratory ruling with the site evaluation committee.	Energy facility siting and decommissioning	Did not pass	adjacent
2020	SB668	Would have created an offshore wind commission, establishing an office of offshore wind industry development in the department of business and economic affairs, and making an appropriation therefor.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2020	SB692	Would have changed certain costs of the public utilities commission for participation in regional activities.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	adjacent
2020	SB73	Would have required the public utilities commission to quantify and consider environmental and socioeconomic costs in state energy plans of electric utilities; interim study.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Interim study	adjacent
2020	SB75	Would have created a commission to study the economic	Climate, emissions, and RGGI	Interim study	core

Year	Bill	Plain topic	Theme	Result	Tier
2021	HB106	impact of national carbon pricing in New Hampshire; interim study. Created procedures for municipal host customer-generators of electrical energy; same bill as 2022 HB106 (carried across the biennium); see that record.	Net metering, community power, and local generation	See next-year record	core
2021	HB148	Allowed increased net energy metering limits for municipal hydroelectric facilities; same bill as 2022 HB148 (carried across the biennium); see that record.	Net metering, community power, and local generation	See next-year record	core
2021	HB167	Changed net energy metering limits for customer generators and the purchase of output of limited electrical energy producers; same bill as 2022 HB167 (carried across the biennium); see that record.	Net metering, community power, and local generation	See next-year record	core
2021	HB168	Would have required the adoption of innovative vehicle emissions standards pursuant to section 177 of the federal Clean Air Act. Created a commission to study the removal of unused utility poles following the transition of equipment, lines, and cables to new utility poles; same bill as 2022 HB169 (carried across the biennium); see that record.	Climate, emissions, and RGGI	Did not pass	adjacent
2021	HB169	Created a commission to study the removal of unused utility poles following the transition of equipment, lines, and cables to new utility poles; same bill as 2022 HB169 (carried across the biennium); see that record.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	See next-year record	adjacent
2021	HB172	Created greenhouse gas emission reduction goals for the state and establishing a	Climate, emissions, and RGGI	See next-year record	core

Year	Bill	Plain topic	Theme	Result	Tier
2021	HB213	climate action plan; same bill as 2022 HB172 (carried across the biennium); see that record. Changed the elimination of useful thermal energy from renewable energy classes; same bill as 2022 HB213 (carried across the biennium); see that record.	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core
2021	HB225	Would have changed the calculation of net energy metering payments or credits.	Net metering, community power, and local generation	Did not pass	core
2021	HB289	Added electrical storage facilities to the 'energy facility' definition for siting review (became law).	Energy facility siting and decommissioning	Became law	core
2021	HB294	Would have changed the purchase of output of limited electrical energy producers.	Net metering, community power, and local generation	Did not pass	core
2021	HB308	Changed broadband access to pole attachments; same bill as 2022 HB308 (carried across the biennium); see that record.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	See next-year record	adjacent
2021	HB309	Rewrote the computation of renewable energy credits and clarified renewable energy classes (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2021	HB315	Let municipal host customer-generators serve political subdivisions through aggregation - groundwork for municipal net-metering projects (became law).	Net metering, community power, and local generation	Became law	core
2021	HB351	Would have changed the system benefits charge.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2021	HB358	Would have changed the installation of	Net metering, community power, and local generation	Did not pass	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2021	HB371	solar energy systems in condominiums. Would have changed proceedings of the public utilities commission on rates and charges.	Electric rates, bills, and ratepayer costs	Did not pass	core
2021	HB373	Addressed state participation in low-carbon fuel standards programs (became law).	Fuels: natural gas, propane, and heating oil	Became law	core
2021	HB376	Created a committee to study applications of microgrids in electricity supply; same bill as 2022 HB376 (carried across the biennium); see that record.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	See next-year record	core
2021	HB382	Created a commission to study the utility rate structure of demand charges; same bill as 2022 HB382 (carried across the biennium); see that record.	Electric rates, bills, and ratepayer costs	See next-year record	core
2021	HB394	Created a commission to study the short and long term impacts of pending national and regional carbon pricing mechanisms on New Hampshire's residents, agriculture, wildlife and natural resources-based tourism sector, and commercial enterprises; same bill as 2022 HB394 (carried across the biennium); see that record.	Climate, emissions, and RGGI	See next-year record	core
2021	HB396	Would have changed credits for certain energy production not issued renewable energy certificates.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2021	HB399	Would have changed the energy consumption reduction goal.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2021	HB407	Would have changed the purchase of output of limited electrical energy producers in intrastate commerce and including qualifying storage system.	Net metering, community power, and local generation	Did not pass	core
2021	HB410	Created a committee to study the requirements of reporting by utility companies of information required for valuation of certain utility property for purposes of RSA 72; same bill as 2022 HB410 (carried across the biennium); see that record.	Energy taxation and host-community revenue	See next-year record	adjacent
2021	HB543	Created a commission to study nuclear power and nuclear reactor technology in New Hampshire; same bill as 2022 HB543 (carried across the biennium); see that record.	Nuclear power	See next-year record	core
2021	HB549	Changed the energy efficiency resource standard and the system benefits charge; same bill as 2022 HB549 (carried across the biennium); see that record.	Energy efficiency, weatherization, and fuel assistance	See next-year record	core
2021	HB610	Banking-department licensing omnibus; 'transmission of consumer complaints' false positive (became law).	—	Became law	context
2021	HB614	Exempted the state and political subdivisions from payment of the costs of compliance with the renewable portfolio standard; same bill as 2022 HB614 (carried	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2021	HB624	across the biennium); see that record. Decreased the fee to file a petition for a declaratory ruling with the site evaluation committee; same bill as 2022 HB624 (carried across the biennium); see that record.	Energy facility siting and decommissioning	See next-year record	adjacent
2021	HB64	Let renewable generation facility property be covered by voluntary payment-in-lieu-of-taxes agreements with municipalities (became law).	Energy taxation and host-community revenue	Became law	core
2021	HB80	Would have changed expenditures from the energy efficiency fund.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2021	SB105	Solar Eclipse Day proclamation; 'solar' false positive (became law).	—	Became law	context
2021	SB109	Would have expanded municipal host customer-generator arrangements serving political subdivisions; died on the Senate table.	Net metering, community power, and local generation	Did not pass	core
2021	SB113	Changed the alternative compliance payments for renewable energy obligations not met through the purchase of renewable energy credits; same bill as 2022 SB113 (carried across the biennium); see that record.	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core
2021	SB115	Would have created greenhouse gas emission reduction goals for the state and establishing a climate action plan.	Climate, emissions, and RGGI	Did not pass	core
2021	SB151	Changed renewable energy procurement;	Renewable generation and the	See next-year record	core

Year	Bill	Plain topic	Theme	Result	Tier
2021	SB71	same bill as 2022 SB151 (carried across the biennium); see that record. Would have created a commission to develop science-based emissions reduction goals for the state of New Hampshire.	RPS: solar, wind, hydro, biomass	Did not pass	core
2021	SB73	Would have created a green building standards initiative as part of the low or moderate income housing loan program and making an appropriation therefor; and establishing a commission to study green housing and utility source options.	Energy efficiency, weatherization, and fuel assistance	Did not pass	adjacent
2021	SB78	Would have continually appropriated the renewable energy fund and clarified renewable classes; died between the chambers.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2021	SB91	The omnibus renewable energy and utilities law: net metering for low-income community solar, storage, and a bundle of utility-regulation updates (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2022	HB1012	Would have changed notice for the cutting of trees by utilities.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	adjacent
2022	HB102	Business-tax combined-reporting study law; 'utilities' false positive (became law).	—	Became law	context
2022	HB106	Would have created procedures for municipal host customer-generators of electrical energy.	Net metering, community power, and local generation	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2022	HB1116	Would have changed renewable energy customer-generators accounts and credits.	Net metering, community power, and local generation	Did not pass	core
2022	HB1123	Would have directed the department of administrative services in collaboration with the department of energy and the department of transportation to support the increased use of biofuels and biodiesel for state procurement needs.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2022	HB1148	Ordered a report on whether local governments can restrict fuel types (the gas-ban preemption question) (became law).	Fuels: natural gas, propane, and heating oil	Became law	adjacent
2022	HB1168	Studied soil-conditioner law and expanded oil discharge cleanup fund reimbursement eligibility (became law).	Fuels: natural gas, propane, and heating oil	Became law	adjacent
2022	HB1191	Electrical, plumbing, and gas-fitting work in small housing; trade licensing, not energy policy.	—	Interim study	context
2022	HB1198	School 'culture and climate' rules; education policy ('climate' false positive).	—	Did not pass	context
2022	HB1248	Would have changed replacement power for net metering customer-generators; interim study.	Net metering, community power, and local generation	Interim study	core
2022	HB1250	Would have required the public utilities commission to consider climate change in making rate-setting decisions.	Climate, emissions, and RGGI	Did not pass	core
2022	HB1258	Implemented the Department of Energy transition and defined 'municipal host' for limited	Utility regulation and governance: the PUC, the Department of	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2022	HB1270	electrical energy producers (became law). Repealed the legislative oversight committee on the electric-services transformation (became law).	Energy, and restructuring Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	adjacent
2022	HB1285	Amended the multi-use energy data platform statute - the shared electric and gas usage-data infrastructure (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2022	HB1316	eFoil electric surfboard rules; recreational watercraft (became law).	—	Became law	context
2022	HB1317	Marine-patrol reporting on electric watercraft; recreational boating.	—	Did not pass	context
2022	HB1328	Would have authorized a utility to petition to be relieved of their carrier of last resort obligations; interim study.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Interim study	core
2022	HB1331	Set power line maintenance and construction rules (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2022	HB1380	Would have changed installation of solar photovoltaic energy systems by owners subject to deed restrictions in a homeowners association.	Net metering, community power, and local generation	Did not pass	adjacent
2022	HB1419	Would have changed establishing a New Hampshire civilian climate corps advisory commission.	Climate, emissions, and RGGI	Did not pass	adjacent
2022	HB1459	Would have changed recycling solar panels.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2022	HB1464	Would have created a committee to study the feasibility and implementation of	Electric vehicles and charging infrastructure	Interim study	core

Year	Bill	Plain topic	Theme	Result	Tier
2022	HB148	furthering electric vehicle adoption in New Hampshire; interim study. Would have allowed increased net energy metering limits for municipal hydroelectric facilities.	Net metering, community power, and local generation	Did not pass	core
2022	HB1491	Strengthened natural gas transmission pipeline safety oversight (became law).	Fuels: natural gas, propane, and heating oil	Became law	core
2022	HB1506	Would have created a revolving clean energy accelerator fund in the department of energy.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2022	HB1517	Would have created a pollinator solar scorecard.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2022	HB1596	Would have changed net energy metering limits for individual and business customers.	Net metering, community power, and local generation	Did not pass	core
2022	HB1599	Clarified rules for customer-generators who sell their renewable energy certificates (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2022	HB1611	Would have changed rules of the site evaluation committee.	Energy facility siting and decommissioning	Did not pass	core
2022	HB1621	Would have changed reducing the rebates distributed by the energy efficiency fund.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2022	HB1628	Would have directed the department of energy to generate a report on the microgrid project currently in progress at the university of New Hampshire in collaboration with the regional utilities.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	adjacent
2022	HB1629	Would have changed default service for	Net metering, community power,	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2022	HB1635	net metering. Would have changed the purchase of output of limited electrical energy producers and including qualifying storage system; interim study.	and local generation Net metering, community power, and local generation	Interim study	core
2022	HB1645	Would have required notification to renewable energy customer-generators of issues related to renewable energy credits.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2022	HB167	Would have changed net energy metering limits for customer generators and the purchase of output of limited electrical energy producers.	Net metering, community power, and local generation	Did not pass	core
2022	HB1675	Would have created a surcharge collected through E-Z Pass for electric vehicles as an alternative road toll.	Electric vehicles and charging infrastructure	Did not pass	core
2022	HB169	Created a commission to study removing unused utility poles after equipment transitions (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	adjacent
2022	HB172	Would have created greenhouse gas emission reduction goals for the state and establishing a climate action plan.	Climate, emissions, and RGGI	Did not pass	core
2022	HB2023	Appropriated money for a state emergency fuel assistance program and a supplemental electric benefit during the 2022 price spike (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core
2022	HB213	Would have changed the elimination of useful thermal energy from renewable energy classes; interim study.	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2022	HB308	Would have changed broadband access to	Grid infrastructure: transmission,	Did not pass	adjacent

		pole attachments.	storage, microgrids, reliability, and data		
2022	HB376	Would have created a committee to study applications of microgrids in electricity supply.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2022	HB382	Would have created a commission to study the utility rate structure of demand charges.	Electric rates, bills, and ratepayer costs	Did not pass	core
2022	HB394	Would have created a commission to study the short and long term impacts of pending national and regional carbon pricing mechanisms on New Hampshire's residents, agriculture, wildlife and natural resources-based tourism sector, and commercial enterprises.	Climate, emissions, and RGGI	Did not pass	core
2022	HB410	Created the commission to study how power generation and utility transmission property is assessed for taxes (became law).	Energy taxation and host-community revenue	Became law	core
2022	HB543	Created the commission to study nuclear power and nuclear reactor technology in New Hampshire (became law).	Nuclear power	Became law	core
2022	HB549	Restructured the system benefits charge and the energy efficiency and sustainable energy board after the 2021 efficiency-order fight (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core
2022	HB614	Would have exempted the state and political subdivisions from payment of the costs of compliance with the renewable	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2022	HB624	portfolio standard; interim study. Would have moved site evaluation committee monitoring to the department of energy and eased hydro net metering; died between the chambers.	Energy facility siting and decommissioning	Did not pass	core
2022	HR16	Called for the federal government to construct a nuclear waste repository to permanently store our nation's nuclear waste (adopted resolution).	Nuclear power	Adopted (resolution)	adjacent
2022	HR17	Addressed opposing all federal and state efforts to establish a carbon tax on fuels for electricity and transportation (adopted resolution). Would have changed the alternative compliance payments for renewable energy obligations not met through the purchase of renewable energy credits; interim study.	Climate, emissions, and RGGI	Adopted (resolution)	core
2022	SB113	Would have changed renewable energy procurement; interim study.	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2022	SB151	Created a committee to study replacing the site evaluation committee (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2022	SB256	Municipal stormwater utilities; water infrastructure ('utility' false positive). Would have changed the definition of "municipal host" for purposes of limited electrical energy producers; interim study.	Energy facility siting and decommissioning	Became law	core
2022	SB257	Expanded net metering	—	Interim study	context
2022	SB259		Net metering, community power, and local generation	Interim study	core
2022	SB261		Net metering, community power, and local generation	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2022	SB262	participation (became law). Updated the rules for customer generators of electric energy (became law).	Net metering, community power, and local generation	Became law	core
2022	SB264	Would have changed certain references to the department of energy and transferring authority over the low-income electricity assistance program to the department of energy; interim study.	Energy efficiency, weatherization, and fuel assistance	Interim study	adjacent
2022	SB265	Extended community power aggregation of electric customers to counties (became law).	Net metering, community power, and local generation	Became law	core
2022	SB268	Set the approval path for power purchase agreements for Gulf of Maine offshore wind energy (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2022	SB269	Would have created a commission to study energy saving weatherization programs; interim study.	Energy efficiency, weatherization, and fuel assistance	Interim study	core
2022	SB270	Created the low-moderate income community solar program - carve-outs in the renewable energy fund for LMI projects (became law).	Net metering, community power, and local generation	Became law	core
2022	SB271	Addressed the Burgess BioPower biomass plant's obligations and cumulative reduction factor (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2022	SB321	Expanded purchase of limited electrical energy producers' output in intrastate commerce, including storage systems (became law).	Net metering, community power, and local generation	Became law	core
2022	SB370	Would have allowed the university system and community college system to be	Net metering, community power, and local generation	Interim study	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
		municipal host electric customer generators; interim study.			
2022	SB417	Would have created an electric school bus pilot program.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2022	SB424	Adjusted renewable energy classes and natural gas rules (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2022	SB429	Amended site evaluation committee procedures (became law).	Energy facility siting and decommissioning	Became law	core
2022	SB440	Restructured the office of offshore wind industry development (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2022	SB447	Would have created the electric vehicle and infrastructure fund.	Electric vehicles and charging infrastructure	Did not pass	core
2022	SB448	Would have changed energy reduction by state agencies.	Energy efficiency, weatherization, and fuel assistance	Did not pass	adjacent
2023	HB111	Created a committee to study electric vehicle charging for residential renters (became law).	Electric vehicles and charging infrastructure	Became law	core
2023	HB132	Trailer tire disclosure by 'utility dealers'; motor-vehicle sales ('utility' false positive).	—	Did not pass	context
2023	HB139	Refined the 'municipal host' definition for limited electrical energy producers (became law).	Net metering, community power, and local generation	Became law	core
2023	HB142	Would have supported continued operation of the Burgess Biopower plant; vetoed over its above-market subsidy structure.	Renewable generation and the RPS: solar, wind, hydro, biomass	Vetoed	core
2023	HB159	Changed the default service rate for electricity; same bill as 2024 HB159 (carried across the biennium); see that record.	Electric rates, bills, and ratepayer costs	See next-year record	core

Year	Bill	Plain topic	Theme	Result	Tier
2023	HB161	Would have changed customer generators of electricity as group hosts under net metering.	Net metering, community power, and local generation	Did not pass	core
2023	HB165	Would have changed department of energy procedures in lieu of meeting renewable portfolio standards for biomass.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2023	HB166	Changed the elimination of useful thermal energy from renewable energy classes; same bill as 2024 HB166 (carried across the biennium); see that record.	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core
2023	HB175	Changed the state's energy consumption reduction goal; same bill as 2024 HB175 (carried across the biennium); see that record.	Energy efficiency, weatherization, and fuel assistance	See next-year record	core
2023	HB176	Changed rules of the site evaluation committee; same bill as 2024 HB176 (carried across the biennium); see that record.	Energy facility siting and decommissioning	See next-year record	core
2023	HB208	Would have created greenhouse gas emission reduction goals for the state and establishing a climate action plan.	Climate, emissions, and RGGI	Did not pass	core
2023	HB211	Required a department of energy report on the system benefits charge's effectiveness (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core
2023	HB219	Cleaned up public utilities statutes (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	adjacent
2023	HB233	Adjusted useful thermal energy's treatment under the renewable portfolio standard (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2023	HB234	Would have changed renewable energy credits.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2023	HB246	Would have changed uses of moneys in the renewable energy fund.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2023	HB251	Would have changed the cost of compliance with disclosure of electric renewable portfolio standards.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2023	HB263	Would have required notification to renewable energy customer-generators of issues related to renewable energy credits.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2023	HB281	Repealed the least-cost integrated resource plan requirement for utilities, replacing it with distribution planning hooks (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2023	HB369	Created a task force to provide energy relief on farms; same bill as 2024 HB369 (carried across the biennium); see that record.	Energy efficiency, weatherization, and fuel assistance	See next-year record	adjacent
2023	HB372	Would have created a commission to study the short and long-term impacts of pending national and regional carbon pricing mechanisms on New Hampshire's citizens, businesses, institutions, and environment.	Climate, emissions, and RGGI	Did not pass	core
2023	HB381	Changed the system benefits charge; same bill as 2024 HB381 (carried across the biennium); see that record.	Energy efficiency, weatherization, and fuel assistance	See next-year record	core
2023	HB385	Streamlined department of energy approval of community power	Net metering, community power, and local generation	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2023	HB418	aggregation plans (became law). Would have changed eliminating the rebates distributed by the energy efficiency fund.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2023	HB456	Changed collecting road tolls on the output of separately metered electric vehicle chargers; same bill as 2024 HB456 (carried across the biennium); see that record.	Electric vehicles and charging infrastructure	See next-year record	core
2023	HB458	Changed participation in net energy metering by small hydroelectric generators; same bill as 2024 HB458 (carried across the biennium); see that record.	Net metering, community power, and local generation	See next-year record	core
2023	HB509	Changed the phasing out of the minimum electric renewable portfolio standard; same bill as 2024 HB509 (carried across the biennium); see that record.	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core
2023	HB523	Would have changed net energy metering limits for individual and business customers.	Net metering, community power, and local generation	Did not pass	core
2023	HB524	Would have changed regional greenhouse gas initiative funds.	Climate, emissions, and RGGI	Did not pass	core
2023	HB558	Changed electric microgrids and electric grid resiliency; same bill as 2024 HB558 (carried across the biennium); see that record.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	See next-year record	core
2023	HB576	Enabled municipal administration of commercial property assessed clean energy (C-PACE) districts (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2023	HB605	Would have changed solar generation under the renewable portfolio standards. Required construction of state buildings or state-funded projects to contain electric	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2023	HB606	vehicle (EV) charging infrastructure; same bill as 2024 HB606 (carried across the biennium); see that record.	Electric vehicles and charging infrastructure	See next-year record	core
2023	HB609	Changed energy facility siting; same bill as 2024 HB609 (carried across the biennium); see that record.	Energy facility siting and decommissioning	See next-year record	core
2023	HB616	Changed administration of the New Hampshire's renewable portfolio standard; same bill as 2024 HB616 (carried across the biennium); see that record.	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core
2023	HB622	Repealed the energy efficiency and sustainable energy board; same bill as 2024 HB622 (carried across the biennium); see that record.	Energy efficiency, weatherization, and fuel assistance	See next-year record	core
2023	HB630	Would have created a revolving clean energy accelerator fund in the department of energy.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2023	HB631	Changed electric utility smart meter gateway devices; same bill as 2024 HB631 (carried across the biennium); see that record.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	See next-year record	adjacent
2023	HB633	Would have changed electric distribution company market share, prohibiting certain electric rate increases, and	Electric rates, bills, and ratepayer costs	Did not pass	core

		biennium); see that record.			
2023	SB166	Directed electric grid modernization: interconnection studies and the grid modernization advisory group (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2023	SB167	Would have changed green hydrogen energy and infrastructure.	Fuels: natural gas, propane, and heating oil	Did not pass	core
2023	SB168	Changed participation in a low-moderate income residential customers community solar project; same bill as 2024 SB168 (carried across the biennium); see that record.	Net metering, community power, and local generation	See next-year record	core
2023	SB186	Low-income e-bike incentive program; personal mobility, not the energy system.	—	Did not pass	context
2023	SB191	Changed road toll registration surcharges for electric vehicles; same bill as 2024 SB191 (carried across the biennium); see that record.	Electric vehicles and charging infrastructure	See next-year record	core
2023	SB225	Created the commission to study the assessing of power generation - the utility-property-tax question towns and generators fight over (became law).	Energy taxation and host-community revenue	Became law	core
2023	SB40	Opened net energy metering participation to small hydroelectric generators (became law).	Net metering, community power, and local generation	Became law	core
2023	SB52	Set the regulatory framework for electric vehicle charging stations - who may resell electricity at the plug (became law).	Electric vehicles and charging infrastructure	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2023	SB54	Authorized purchased power agreements for electric distribution utilities' default service (became law).	Electric rates, bills, and ratepayer costs	Became law	core
2023	SB68	Would have changed municipal host for purposes of limited electrical energy producers.	Net metering, community power, and local generation	Did not pass	core
2023	SB69	Would have changed allowing certain nonprofits to participate as a customer-generator group hosts under net energy metering.	Net metering, community power, and local generation	Did not pass	core
2023	SB79	Would have expanded customer-generator participation in net energy metering; vetoed.	Net metering, community power, and local generation	Vetoed	core
2023	SB96	Rebuilt state energy performance contracting for efficiency in public buildings (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core
2024	HB1161	Let the public school infrastructure fund pay for energy-efficient school buses (became law).	Electric vehicles and charging infrastructure	Became law	adjacent
2024	HB1230	Would have changed establishing a committee to examine weatherization initiatives for homes in New Hampshire.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2024	HB1289	Would have created a commission to study the replacement of the peaker plant in Bow with a clean energy baseload generator and storage.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2024	HB1332	Would have changed prohibiting electric vehicles from parking in parking garages.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2024	HB1333	Would have changed prohibiting state agencies from buying infrastructure	Electric vehicles and charging infrastructure	Interim study	adjacent

Year	Bill	Plain topic	Theme	Result	Tier
2024	HB1395	or leasing fleet electric vehicles for 10 years; interim study. Would have changed home heating oil and propane contracts; interim study.	Fuels: natural gas, propane, and heating oil	Interim study	core
2024	HB1398	Would have changed utility recovery of costs associated with net energy metering; interim study.	Net metering, community power, and local generation	Interim study	core
2024	HB1403	Temporary waivers for vehicle emission-control equipment; motor-vehicle inspection mechanics.	—	Interim study	context
2024	HB1416	Would have changed prohibiting parking of non-electric vehicles in spaces designated for charging electric vehicles.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2024	HB1430	Would have changed electric rates approved by the public utilities commission for residential condominium property.	Electric rates, bills, and ratepayer costs	Did not pass	core
2024	HB1431	Required utility integrated distribution planning - the forward grid-investment plans (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2024	HB1445	Electric bicycles, scooters, and unicycles; personal mobility devices.	—	Did not pass	context
2024	HB1464	Would have created a committee to study revenue alternatives to the road toll, road toll registration charges, and revenue alternatives to vehicle registration fees, including electric vehicle registration fees.	Electric vehicles and charging infrastructure	Did not pass	core
2024	HB1465	Ordered studies of nuclear energy technologies and renamed the offshore	Nuclear power	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2024	HB1471	wind office the office of energy innovation (became law). Solar-eclipse school holiday; 'solar' false positive.	—	Did not pass	context
2024	HB1472	Would have changed rebates of energy efficiency funds for electric vehicles.	Electric vehicles and charging infrastructure	Did not pass	core
2024	HB1486	Would have changed proxy carbon pricing in state procurement.	Climate, emissions, and RGGI	Did not pass	core
2024	HB1491	Would have prohibited the repricing of heating fuel subsequent to a concluded sale.	Fuels: natural gas, propane, and heating oil	Did not pass	core
2024	HB1499	Created a committee to study the civilian clean energy, community resilience, and conservation corps, and establishing a committee to study the child protection act (became law).	Climate, emissions, and RGGI	Became law	adjacent
2024	HB1510	Would have created a commission to identify barriers to and solutions for electric vehicle sales and use.	Electric vehicles and charging infrastructure	Did not pass	core
2024	HB1543	Personal electric vehicles (skateboards and similar); personal mobility devices.	—	Did not pass	context
2024	HB1576	Would have changed allowing property owners to opt out of public utilities.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2024	HB1580	Would have changed the prohibition of government procurement of electric vehicles containing components created through the use of forced labor.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2024	HB159	Would have changed the default service rate for electricity.	Electric rates, bills, and ratepayer costs	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2024	HB1600	Refined community power aggregation by municipalities and counties (became law).	Net metering, community power, and local generation	Became law	core
2024	HB1617	Would have changed energy procurement agreements for default service; interim study.	Electric rates, bills, and ratepayer costs	Interim study	core
2024	HB1623	Rewrote the state energy policy statute (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2024	HB1641	Would have addressed relating to requiring large parking lots to have a solar power canopy.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	adjacent
2024	HB1644	Would have required the department of energy to initiate an investigation of the benefits and key considerations regarding support for clean or non-carbon emitting power generation.	Nuclear power	Did not pass	core
2024	HB166	Would have changed the elimination of useful thermal energy from renewable energy classes.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2024	HB1697	Set rules for forest carbon credit programs (became law).	Climate, emissions, and RGGI	Became law	adjacent
2024	HB1700	Cloud-seeding and weather-modification ban; atmospheric intervention, not energy ('emissions' false positive).	—	Did not pass	context
2024	HB1709	Would have created the forest carbon commission.	Climate, emissions, and RGGI	Did not pass	adjacent
2024	HB175	Would have changed the state's energy consumption reduction goal.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2024	HB176	Would have changed rules of the site	Energy facility siting and decommissioning	Did not pass	core

2024	SB496	DHHS climate and health protection program; public health.	—	Did not pass	context
2024	SB540	Would have required the department of energy to investigate behind the meter and utility scale energy storage; interim study.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Interim study	core
2024	SB550	Would have changed utility requirements for integrated distribution planning; interim study.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Interim study	core

Year	Bill	Plain topic	Theme	Result	Tier
2024	SB584	Would have changed application of the utility property tax to certain renewable electric generating facilities, and relative to communications services tax revenues; interim study.	Energy taxation and host-community revenue	Interim study	core
2024	SB595	Set the rates framework for pole attachments (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	adjacent
2025	HB106	Would have created a commission to determine the monetary costs of climate damage to the state of New Hampshire and the best means of recouping such costs.	Climate, emissions, and RGGI	Did not pass	adjacent
2025	HB123	Defined pre-sequestration timber tax revenue and set a carbon-sequestration moratorium with a study commission (became law).	Climate, emissions, and RGGI	Became law	adjacent
2025	HB169	Would have changed a quorum of the public utilities commission.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	adjacent
2025	HB174	Utility terrain vehicle weight limits; 'utility' false positive.	—	Did not pass	context
2025	HB182	Would have prohibited electric vehicles in commercial parking garages.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2025	HB189	Updated the 10-year state energy strategy and removed the energy efficiency and sustainable energy board references (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2025	HB219	Changed the phasing out of the minimum electric renewable portfolio standard; same bill as 2026	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core

Year	Bill	Plain topic	Theme	Result	Tier
2025	HB224	HB219 (carried across the biennium); see that record. Changed rebates to ratepayers from the renewable energy fund; same bill as 2026 HB224 (carried across the biennium); see that record.	Renewable generation and the RPS: solar, wind, hydro, biomass	See next-year record	core
2025	HB243	Gut-and-amend omnibus whose energy piece regulated electric-vehicle charging stations and weights-and-measures testing fees; died between the chambers.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2025	HB278	Would have changed proxy carbon pricing in state procurement.	Climate, emissions, and RGGI	Did not pass	core
2025	HB306	Would have created a commission to study the short and long-term impacts of pending national and regional carbon pricing mechanisms on New Hampshire's citizens, businesses, institutions, and environment.	Climate, emissions, and RGGI	Did not pass	core
2025	HB342	Would have enabled municipal adoption of energy efficient and clean energy districts; passed both chambers in different forms and died on a House non-concur.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2025	HB441	Visible diesel-exhaust ('rolling coal') enforcement; motor-vehicle law.	—	Did not pass	context
2025	HB450	Would have changed commercial property assessed clean energy and resiliency (C-PACER).	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2025	HB460	Would have changed utility investments in distributed energy resources.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2025	HB504	Restated the state energy policy (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2025	HB526	Would have created a climate change and damage division in the department of environmental services.	Climate, emissions, and RGGI	Did not pass	adjacent
2025	HB535	Would have changed defining the role of the public utilities commission.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2025	HB537	Would have changed electric rates approved by the public utilities commission for residential condominium property.	Electric rates, bills, and ratepayer costs	Did not pass	core
2025	HB539	Would have required electric utilities to use residential electric rates for certain types of residential condominiums.	Electric rates, bills, and ratepayer costs	Did not pass	core
2025	HB541	Would have created a committee to study energy and telecommunications infrastructure survivability and resiliency.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2025	HB560	Gut-and-amend omnibus carrying the carbon-sequestration moratorium package; and died between the chambers.	Climate, emissions, and RGGI	Did not pass	adjacent
2025	HB567	Would have changed the elimination of useful thermal energy from renewable energy classes.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2025	HB575	Would have prohibited offshore wind energy infrastructure.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2025	HB599	Would have created a committee to examine	Energy efficiency, weatherization, and fuel assistance	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2025	HB627	weatherization initiatives for homes in New Hampshire. Telephone Lifeline program providers; telecommunications assistance (became law).	—	Became law	context
2025	HB654	Would have changed allowing small customer-generators the ability to participate in group-net metering.	Net metering, community power, and local generation	Did not pass	core
2025	HB658	Raised the reimbursement cap from the oil discharge and disposal cleanup fund (became law).	Fuels: natural gas, propane, and heating oil	Became law	adjacent
2025	HB672	Allowed off-grid electricity providers to operate outside utility franchises (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2025	HB674	Would have required non-wire alternatives review, time-of-use tariffs, and multi-year rate settings - the record's main rate-design package; died on the House table.	Electric rates, bills, and ratepayer costs	Did not pass	core
2025	HB680	Would have changed standardizing homeowners' associations' electricity billing for shared meter usage.	Electric rates, bills, and ratepayer costs	Did not pass	core
2025	HB681	Would have created a statewide online energy data platform.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2025	HB682	Reorganized the offshore wind office into the office of energy innovation and restructured the port development commission (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2025	HB690	Ordered the department of energy to investigate withdrawing from ISO-New England and other regional-	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2025	HB692	market strategy options (became law). Would have changed utility companies adopting advanced meters.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2025	HB696	Standardized how utility property taxes and the statewide education property tax apply to electric generating facilities (became law).	Energy taxation and host-community revenue	Became law	core
2025	HB708	Telephone area-code planning by the department of energy; telecommunications.	—	Did not pass	context
2025	HB710	Would have enabled electric utilities to own and offer advanced nuclear resources; died between the chambers.	Nuclear power	Did not pass	core
2025	HB715	Personal electric vehicles; personal mobility devices.	—	Did not pass	context
2025	HB723	Repealed the multi-use energy data platform before it launched; same bill as 2026 HB723 (carried across the biennium); see the 2026 record.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	See next-year record	core
2025	HB755	Would have changed the state's electric utility market.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2025	HB759	Would have changed community energy generators.	Net metering, community power, and local generation	Did not pass	core
2025	HB760	Would have changed utility default service.	Electric rates, bills, and ratepayer costs	Did not pass	core
2025	HB761	Would have changed customer energy storage.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2025	HB764	Cloud-seeding and weather-modification ban; atmospheric intervention.	—	Did not pass	context

Year	Bill	Plain topic	Theme	Result	Tier
2025	HB95	Would have required the New Hampshire electric co-op regularly file a certificate of deregulation with the public utilities commission.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	adjacent
2025	HB96	Would have required New Hampshire builders to use the 2021 Energy Building codes or a similar code that achieves equivalent or greater energy savings.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2025	HCR1	Resolution calling for full consideration of climate information in policymaking (adopted by the House; no Senate action recorded).	Climate, emissions, and RGGI	Adopted (resolution)	adjacent
2025	HCR2	Resolution declaring advanced nuclear energy development in the state's best interest (adopted by the House; no Senate action recorded).	Nuclear power	Adopted (resolution)	core
2025	HCR4	Resolution rejecting all offshore wind projects off New Hampshire and in the Gulf of Maine (adopted by the House; no Senate action recorded).	Renewable generation and the RPS: solar, wind, hydro, biomass	Adopted (resolution)	core
2025	HR15	Resolution urging a change in Federal Energy Regulatory Commission policy (adopted by the House).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Adopted (resolution)	adjacent
2025	SB108	Updated department of energy statutes (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2025	SB228	Would have eased the limitations on community customer generators; killed on the House floor.	Net metering, community power, and local generation	Did not pass	core
2025	SB230	Would have changed electric utility	Grid infrastructure: transmission,	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
		restructuring and investment in distributed energy resources.	storage, microgrids, reliability, and data		
2025	SB232	Clarified net metering terms and conditions (became law).	Net metering, community power, and local generation	Became law	core
2025	SB233	Restructured the grid modernization advisory group (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2025	SB234	Would have changed the electric assistance program.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2025	SB236	Transferred the Electric Assistance Program - the ratepayer-funded low-income bill discount - to the department of energy (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core
2025	SB237	Would have changed the office of the consumer advocate and the site evaluation committee.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2025	SB272	Would have changed electric-vehicle charging station funding.	Electric vehicles and charging infrastructure	Did not pass	core
2025	SB277	Would have standardized utility property taxes and SWEPT on electric generating facilities (Senate version of HB696); killed at the Senate deadline.	Energy taxation and host-community revenue	Did not pass	core
2025	SB302	Solid-waste facility siting board; waste policy borrowing the 'site evaluation committee' name.	—	Did not pass	context
2025	SB4	Enabled commercial property assessed clean energy and resiliency (C-PACER) financing (became law).	Energy efficiency, weatherization, and fuel assistance	Became law	core
2025	SB65	Set stormwater management standards for solar arrays (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	adjacent
2026	CACR30	Would have made public utilities	Utility regulation and governance: the	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	HB1002	commissioners elected rather than appointed; killed on the House floor. Would have repealed the solar energy systems tax exemption.	PUC, the Department of Energy, and restructuring Energy taxation and host-community revenue	Did not pass	core
2026	HB1028	Would have changed the definition of a renewable generation facility; killed in committee.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2026	HB1029	Would have changed the definition of excavation under underground utility damage prevention laws.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	adjacent
2026	HB1074	OHRV and snowmobile fee remission; recreation ('fuel' fee text).	—	Did not pass	context
2026	HB1095	Utility terrain vehicle weight limits; 'utility' false positive (became law).	—	Became law	context
2026	HB1169	Would have changed notification waiting periods to the underground utility damage prevention laws.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	adjacent
2026	HB1180	Would have updated the definition of the state building code to include the International Energy Conservation Code 2024.	Energy efficiency, weatherization, and fuel assistance	Did not pass	core
2026	HB1189	Solid-waste site evaluation committee; waste policy; interim study.	—	Interim study	context
2026	HB1205	Prohibited state and county lands from joining timber carbon-sequestration projects (became law).	Climate, emissions, and RGGI	Became law	adjacent
2026	HB1262	Regulated home heating oil and propane contracts and sales - prepaid-contract consumer protection (became law).	Fuels: natural gas, propane, and heating oil	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	HB1290	Would have changed customer energy storage.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2026	HB1410	Would have created a new classification for electric vehicles; interim study.	Electric vehicles and charging infrastructure	Interim study	adjacent
2026	HB1432	Would have changed electric utility rate classification and cost allocation for condominium associations.	Electric rates, bills, and ratepayer costs	Did not pass	core
2026	HB1440	Would have changed properties enrolled in carbon sequestration and RGGI programs.	Climate, emissions, and RGGI	Did not pass	adjacent
2026	HB1455	Would have changed the criteria for reliable energy sources.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2026	HB1475	Would have directed the department of energy to study the portion of electric distribution costs attributable to fixed versus usage-based charges.	Electric rates, bills, and ratepayer costs	Did not pass	core
2026	HB1533	Electric bicycles and micromobility devices; personal mobility; interim study.	—	Interim study	context
2026	HB1534	Would have changed utility default service.	Electric rates, bills, and ratepayer costs	Did not pass	core
2026	HB1535	Clarified eligible renewable energy classes under the renewable portfolio standard (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2026	HB1536	Would have created penalties for unauthorized parking in designated electric vehicle and motorcycle spaces.	Electric vehicles and charging infrastructure	Did not pass	adjacent
2026	HB1539	Authorized utilities to issue AAA-rated securitization bonds for storm cost recovery and grid resilience (became law).	Electric rates, bills, and ratepayer costs	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	HB1542	Would have created a committee to study New Hampshire's electric renewable portfolio standard and the renewable energy fund.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core
2026	HB1577	Allowed disclosure of utility customer data to municipalities for emergency response planning (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	adjacent
2026	HB1594	Created a weight-based tiered registration fee schedule for electric and plug-in hybrid vehicles (became law).	Electric vehicles and charging infrastructure	Became law	core
2026	HB1614	Coal-tar sealant restrictions; environmental product regulation ('coal' false positive); interim study.	—	Interim study	context
2026	HB1618	Solar-radiation-modification and weather-modification ban; atmospheric intervention.	—	Did not pass	context
2026	HB1620	Required removal of long-unused residential underground heating oil tanks (became law).	Fuels: natural gas, propane, and heating oil	Became law	core
2026	HB1666	Would have required capacity planning in the state 10-year energy strategy.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2026	HB1703	Bike-path registration fees including e-bikes; recreation.	—	Did not pass	context
2026	HB1718	Authorized energy storage in connection with net metering (became law).	Net metering, community power, and local generation	Became law	core
2026	HB1721	Would have changed limiting new system enrollment and adjusting compliance payments under the renewable portfolio standard program.	Renewable generation and the RPS: solar, wind, hydro, biomass	Did not pass	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	HB1722	Would have changed consumer protections and energy classifications for large-use electric facilities.	Electric rates, bills, and ratepayer costs	Did not pass	core
2026	HB1723	Required utilities and grid operators to assess high-voltage transformers' vulnerability to geomagnetic and electromagnetic events (became law).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2026	HB1724	Would have changed public transparency of electric utility retail charges and cost reporting for transmission, wholesale electricity, capacity, and generation adequacy.	Electric rates, bills, and ratepayer costs	Did not pass	core
2026	HB1733	Reformed the reconciliation of default electric service rates (became law).	Electric rates, bills, and ratepayer costs	Became law	core
2026	HB1736	Would have repealed the authority of the public utilities commission to approve alternative forms of regulation for utilities.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2026	HB1738	Redirected ratepayer benefits from RGGI and addressed energy procurement and nuclear options (became law).	Climate, emissions, and RGGI	Became law	core
2026	HB1739	Would have changed energy infrastructure, economic development, and workforce training for large-scale data facilities.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2026	HB1741	Would have changed the enrollment and use of distributed energy resource aggregations by electric utilities.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	core
2026	HB1742	Protected customer-generators inadvertently enrolled	Net metering, community power, and local generation	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	HB1743	in municipal or county aggregation programs (became law). Would have required disclosure of radiation levels emitted by smart meters.	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Did not pass	adjacent
2026	HB1745	Would have changed the allocation of public utility costs to ratepayers.	Electric rates, bills, and ratepayer costs	Did not pass	core
2026	HB1748	Would have created the New Hampshire energy efficiency and resource development authority; interim study.	Energy efficiency, weatherization, and fuel assistance	Interim study	core
2026	HB1775	Addressed utility ownership of natural gas and nuclear power generation facilities (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2026	HB212	Waiver when a vehicle fails an emission-control test; motor-vehicle inspection mechanics.	—	Did not pass	context
2026	HB219	Would have changed the minimum electric renewable portfolio standards; interim study.	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2026	HB221	Would have enabled electric utilities to own and offer advanced nuclear resources (the biennium's third try); vetoed, no override recorded as of collection.	Nuclear power	Vetoed	core
2026	HB224	Would have changed rebates to ratepayers from the renewable energy fund; interim study.	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2026	HB246	Conservation-district climate resilience grants; agricultural conservation.	—	Did not pass	context
2026	HB266	Restructured the department of energy	Utility regulation and governance: the	Became law	core

Year	Bill	Plain topic (with an unrelated recording-consent rider) (became law).	Theme PUC, the Department of Energy, and restructuring	Result	Tier
2026	HB454	Would have required that retailers of fuel blends with 15% ethanol also offer fuel blends with 10% or lower ethanol content; interim study.	Fuels: natural gas, propane, and heating oil	Interim study	adjacent
2026	HB610	Created the residential ratepayers advisory board (became law).	Electric rates, bills, and ratepayer costs	Became law	core
2026	HB707	Created a solid-waste site evaluation committee; waste policy borrowing the SEC name (became law).	—	Became law	context
2026	HB723	Repealed the multi-use energy data platform before it launched (became law, Chapter 28).	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core
2026	HR35	Cloud-seeding prohibition resolution; atmospheric intervention (adopted by the House).	—	Adopted (resolution)	context
2026	SB106	Would have changed the participation of customer generators in net energy metering.	Net metering, community power, and local generation	Did not pass	core
2026	SB112	Would have changed purchased power agreements for electric distribution utilities; interim study.	Electric rates, bills, and ratepayer costs	Interim study	core
2026	SB150	Would have defined electric vehicle charging station and charging a fee for annual testing by the division of weights and measures.	Electric vehicles and charging infrastructure	Did not pass	core
2026	SB428	Electricians' board term limits; occupational licensing (became law).	—	Became law	context
2026	SB440	Enabled municipal adoption of energy efficient and clean	Energy efficiency, weatherization, and fuel assistance	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	SB447	energy districts - the C-PACE expansion HB342 attempted (became law). Would have enabled electric utilities to own, operate, and offer advanced nuclear resources, and relative to purchased power agreements for electric distribution utilities and limitations on community customer generators.	Nuclear power	Did not pass	core
2026	SB449	Would have changed relative to the participation of large customer-generators in net metering and relative to energy storage in connection with net metering.	Net metering, community power, and local generation	Did not pass	core
2026	SB536	Solid-waste facility site evaluation committee; waste policy; interim study.	—	Interim study	context
2026	SB537	Would have repealed the authorization for the public utilities commission to approve alternative forms of regulation.	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Did not pass	core
2026	SB538	Extended net metering eligibility terms for municipal energy projects (became law).	Net metering, community power, and local generation	Became law	core
2026	SB539	Would have changed eligible biomass technology in the renewable portfolio standards; interim study.	Renewable generation and the RPS: solar, wind, hydro, biomass	Interim study	core
2026	SB540	Legalized plug-in solar generation systems for renters and homeowners (became law).	Net metering, community power, and local generation	Became law	core
2026	SB589	Directed port electrification, microgrid development, and cybersecurity standards for energy	Grid infrastructure: transmission, storage, microgrids, reliability, and data	Became law	core

Year	Bill	Plain topic	Theme	Result	Tier
2026	SB590	and water systems (became law). Refined community power electric aggregation plans (became law).	Net metering, community power, and local generation	Became law	core
2026	SB591	Allowed utility companies to own or build generation facilities - a step back from restructuring's divestiture (became law).	Utility regulation and governance: the PUC, the Department of Energy, and restructuring	Became law	core
2026	SB592	Enabled regional conservation and energy resource planning for habitat strongholds (became law).	Energy facility siting and decommissioning	Became law	adjacent
2026	SB597	Would have changed utility rate increases to inflation-adjusted thresholds and performance incentive metrics for utilities; interim study.	Electric rates, bills, and ratepayer costs	Interim study	core
2026	SB599	Amended the renewable energy fund statute (became law).	Renewable generation and the RPS: solar, wind, hydro, biomass	Became law	core
2026	SB628	Would have enabled curbside electric-vehicle charging; interim study.	Electric vehicles and charging infrastructure	Interim study	core

Appendix B — Theme scorecards and history baskets

Each theme's track record, with its history basket: what similar ideas did before. Baskets describe the record; they are not advice. Counts cover the 375-bill policy set.

ELECTRIC RATES, BILLS, AND RATEPAYER COSTS

24 bills · 4 became law · basket: **Rarely moved before** · certainty: high

The proposal territory that moves least: 24 policy bills, 4 laws - and the rate-DESIGN bills all died. The record's main package, HB674 (2025: non-wire alternatives, time-of-use tariffs, multi-year rate settings), died on the House table; the condominium rate bills died four times (HB1430 2024; HB537, HB539 2025; HB1432 2026); the default-service reform bills died (HB159 2023-24; HB760 2025; HB1534 2026) until HB1733 (2026) reformed default-service reconciliation; and both transparency bills (HB1724, HB1745, 2026) died in committee. What passed is narrow: purchased-power agreements for default service (SB54 2023), the reconciliation law, the residential ratepayers advisory board (HB610 2026), and storm-cost securitization bonds (HB1539 2026). SB597 (2026), tying rate increases to inflation thresholds with performance metrics, sits in interim study.

Examples: 2020 HB1396, 2021 HB371, 2022 HB382, 2023 HB633, 2023 SB54, 2024 HB1430

NET METERING, COMMUNITY POWER, AND LOCAL GENERATION

62 bills · 19 became law · basket: **Often moved before** · certainty: high

The record's biggest theme (62 policy bills, 19 laws) and its clearest success story - but the expansion ceiling held for years. Community power passed in steps: municipal hosts serving political subdivisions (HB315 2021), county aggregation (SB265 2022), plan approvals (HB385 2023), the municipal/county rewrite (HB1600 2024), plan refinements (SB590 2026), and inadvertent-enrollment protection (HB1742 2026). Low-income community solar carved its niche (SB270 2022; SB161 2023). The capacity-cap fights mostly lost: the 5-megawatt bills were vetoed in 2020 (SB159, override failing 207-130; HB466, 199-139) and 2023 (SB79, House 194-179 before the veto), and the 2025-2026 expansion bills died (SB228, killed 190-151; SB449, killed 181-158; SB106, postponed 172-152) - but the biennium still delivered storage-with-net-metering (HB1718), municipal terms (SB538), and plug-in solar systems (SB540), all 2026 laws.

Examples: 2020 HB1215, 2020 HB1218, 2020 HB1225, 2020 HB1262, 2020 HB1402, 2020 HB1479

RENEWABLE GENERATION AND THE RPS: SOLAR, WIND, HYDRO, BIOMASS

55 bills · 13 became law · basket: **Mixed** · certainty: high

55 policy bills, 13 laws, and a reversal of direction inside the period. 2020's expansion bills were vetoed (SB124's RPS raise, 214-141 in the House before the veto); 2021-2022 passed the omnibus SB91, REC reforms (HB309), Burgess BioPower relief (SB271), and the offshore-wind machinery (SB268 power-purchase approvals; SB440's industry office). Then the turn: the Burgess rescue was vetoed in 2023 (HB142, override failing 194-159), the RPS phase-out bills reached interim study (HB509 2024; HB219 2026, after a 175-152 House win), the House adopted HCR4 rejecting all offshore wind in the Gulf of Maine (195-149), HB575's outright prohibition died only on the table, the offshore wind office became the 'office of energy innovation' (HB1465 2024; HB682 2025, House 206-163), and the 2025 trailer swept the renewable energy fund. The 2026 laws are housekeeping (HB1535's class clarifications; SB599's fund amendments).

Examples: 2020 HB1116, 2020 HB1364, 2020 HB1366, 2020 HB1370, 2020 HB1478, 2020 HB1518

UTILITY REGULATION AND GOVERNANCE: THE PUC, THE DEPARTMENT OF ENERGY, AND RESTRUCTURING

34 bills · 14 became law · basket: **Often moved before** · certainty: high

The best-passing theme (14 of 34 policy bills became law) - because the majority kept building its own machine. The Department of Energy was created inside the 2021 trailer (91:187), then implemented and adjusted by standalone laws nearly every year (HB1258 2022; HB219 2023; SB388 2024; SB108 2025; HB266 2026). Energy-policy statutes were rewritten twice (HB1623 2024, House 184-168; HB504 2025, 204-165), the 10-year strategy updated (HB189 2025, 206-148), and HB690 (2025, House 200-155) ordered the state to study leaving ISO-New England. Accountability bills died: electing PUC commissioners (CACR30 2026), Eversource market-share limits (HB633 2023), retail-charge transparency (HB1724 2026), cost-allocation reform (HB1745 2026), performance incentives (SB499 2020; SB320 2024, interim study), and the PUC-role definition (HB535 2025). The exceptions: the residential ratepayers advisory board (HB610 2026) and off-grid providers (HB672 2025, House 185-151).

Examples: 2020 HB568, 2020 SB499, 2020 SB692, 2020 SB73, 2022 HB1012, 2022 HB1258

GRID INFRASTRUCTURE: TRANSMISSION, STORAGE, MICROGRIDS, RELIABILITY, AND DATA

43 bills · 14 became law · basket: **Mixed** · certainty: high

43 policy bills, 14 laws - planning and studies pass, hard investment rules die. Grid modernization got its law (SB166 2023) and advisory group (SB233 2025); integrated distribution planning passed (HB1431 2024) after four years of tries; microgrids got their study (HB558 2024) and then port electrification and microgrid development (SB589 2026); storm-cost securitization passed (HB1539 2026); and HB1723 (2026) ordered transformer-vulnerability assessments. Storage passed early as a framework (HB715 2020; HB289 2021 for siting) and stalled late as policy (SB540 2024, interim; HB761 2025 and HB1290 2026, dead). The energy data platform - the infrastructure behind smart rates - was built in statute (2021 trailer; HB1285 2022), never launched, and repealed (HB723, Chapter 28 of 2026) after the replacement bills died (SB165 2023-24; HB681 2025). Transmission-scale bills died at the Senate deadline (SB307 2024) and on the table (SB386 2024).

Examples: 2020 HB1301, 2020 HB1405, 2020 HB1429, 2020 HB1430, 2020 HB715, 2020 SB256

ENERGY EFFICIENCY, WEATHERIZATION, AND FUEL ASSISTANCE

41 bills · 9 became law · basket: **Got support but didn't finish** · certainty: high

The NHSaves proposal's home theme: 41 policy bills, 9 laws, and a decade-defining 2021-2022 fight. After the PUC's late-2021 order slashed the utilities' three-year efficiency plan, HB549 (2022) rebuilt the system benefits charge by formula and passed the House 343-0 - settling the crisis by capping the growth path; SB113 (2023) then required legislative approval for future SBC increases. The efficiency-fund raids failed (SB122 was vetoed in 2020, 212-140 in the House before the veto; HB1621 2022 and HB418 2023 died), but so did every weatherization expansion: the study committees died or stalled (SB269 2022, interim study 182-152; HB1230 2024; HB599 2025), the consumption-reduction goals died (HB1261 2020 through HB175 2024), and the efficiency-authority bill sits in interim study (HB1748 2026). What passed: emergency fuel assistance in the 2022 price spike (HB2023, Senate 23-0 on the remainder), the Electric Assistance Program transfer (SB236 2025), C-PACER financing (SB4 2025, Senate 23-0; municipal districts SB440 2026), and state performance contracting (SB96 2023). The building-code half died: the 2021 energy code (HB96 2025, tabled 199-135) and the 2024 IECC update (HB1180 2026).

Examples: 2020 HB1261, 2020 HB1317, 2020 HB1355, 2020 HB1365, 2020 HB1418, 2020 HB1480

FUELS: NATURAL GAS, PROPANE, AND HEATING OIL

14 bills · 7 became law · basket: **Often moved before** · certainty: medium

The smallest big theme (14 policy bills) with the highest pass rate (7 laws) - consumer protection passes, market restructuring never appears. Home heating oil and propane contract protections passed (HB1262 2026) after the 2024 versions stalled (HB1395, interim study; HB1491, killed); underground heating-oil tank removal passed (HB1620 2026); pipeline safety passed (HB1491 2022); the oil discharge cleanup fund was raised (HB658 2025); and the gas-ban-preemption report law (HB1148 2022) answered the fuel-restriction question. The study bills died: propane ancillary charges (HB81 2023), the Jones Act's effect on heating fuel (SB102 2023), and green hydrogen (SB167 2023).

Examples: 2020 SB429, 2021 HB373, 2022 HB1148, 2022 HB1168, 2022 HB1491, 2023 HB81

NUCLEAR POWER

10 bills · 2 became law · basket: **Got support but didn't finish** · certainty: high

A pivot theme: 10 policy bills, 2 laws, and momentum arriving late. The 2020 decommissioning and waste bills died on the table; HB543 (2022) created the nuclear study commission; HB1465 (2024) ordered nuclear-technology studies while renaming the offshore wind office the office of energy innovation; HCR2 (2025) declared advanced nuclear in the state's interest. Then the utility-ownership fight: letting electric utilities own advanced nuclear died between the chambers (HB710 2025), died in the Senate (SB447 2026), and was VETOED as HB221 (2026, no override recorded as of collection) - while HB1775 (2026, House 198-153), covering utility ownership of natural gas and nuclear generation, became law alongside SB591's broader utility-owned-generation authority.

Examples: 2020 HB412, 2020 HB704, 2022 HB543, 2022 HR16, 2024 HB1465, 2024 HB1644

ELECTRIC VEHICLES AND CHARGING INFRASTRUCTURE

29 bills · 5 became law · basket: **Rarely moved before** · certainty: medium

29 policy bills, 5 laws - and the money bills all died. The regulatory frame passed: charging-station regulation (SB52 2023, surviving a 183-188 tabling attempt), the renters' charging study (HB111 2023, surviving reconsideration 170-177), the EV/battery council (SB430 2024), and the weight-based EV registration fee schedule (HB1594 2026), which replaced the 2023 trailer's flat surcharge approach. Everything with an appropriation died: the EV and infrastructure fund (SB447 2022), charging-station funding (SB272 2025, killed 195-163), state-building charging (HB606 2023-24, interim study), curbside charging (SB628 2026, interim study), and every road-toll-alternative study (HB1464, SB191 2024).

Examples: 2020 HB1620, 2022 HB1123, 2022 HB1464, 2022 HB1675, 2022 SB417, 2022 SB447

CLIMATE, EMISSIONS, AND RGGI

36 bills · 5 became law · basket: **Rarely moved before** · certainty: high

The one-way theme: 36 policy bills, 5 laws, and every affirmative climate bill dead. The climate action plan / greenhouse-gas goals bills died in 2020, 2021, 2022 (tabled), and 2023 (killed on the floor); carbon pricing died four ways (HB735 2020; the study commissions 2021-2025; proxy pricing HB1486 2024 and HB278 2025); the RGGI expansion (HB1496 2020) passed the House 180-101 and died on the Senate table, while the RGGI-repeal-direction bills also died (HB524 2023, failing 181-186) - until HB1738 (2026) redirected RGGI ratepayer benefits as law. The House adopted HR17 (2022, 178-159) opposing all carbon taxes and HCR1 (2025). What passed otherwise is defensive or peripheral: the forest carbon credit rules (HB1697 2024), the sequestration moratorium (HB123 2025), and the state-lands sequestration ban (HB1205 2026).

Examples: 2020 HB1444, 2020 HB1496, 2020 HB1664, 2020 HB735, 2020 SB427, 2020 SB590

ENERGY TAXATION AND HOST-COMMUNITY REVENUE

14 bills · 5 became law · basket: **Got support but didn't finish** · certainty: medium

The overlap theme with the property-taxes packet, included here from the energy angle: 14 policy bills, 5 laws. The assessing-power-generation study commissions passed three times (HB410 2022; SB225 2023; HB458 2024) before HB696 (2025) standardized utility property taxes and SWEPT on electric generating facilities as law - its Senate twin (SB277) died at the Senate deadline the same year. The renewable-exemption bills mostly died (HB1210 2020 storage; HB1406 2020 and SB424/SB530 2020 solar; HB1002 2026 repeal attempt, dead on the table), while the PILT option for renewable generation passed (HB64 2021) and SB584 (2024, interim study) carried the utility-tax-on-renewables question.

Examples: 2020 HB1210, 2020 HB1237, 2020 HB1406, 2020 HB1631, 2020 SB424, 2020 SB530

ENERGY FACILITY SITING AND DECOMMISSIONING

13 bills · 6 became law · basket: **Often moved before** · certainty: medium

13 policy bills, 6 laws - the Site Evaluation Committee was remade inside the period. The 2021 trailer shrank it and attached it to the new department (91:227) and created the revision study (91:228); SB256 (2022) studied replacing it outright; SB429 (2022) amended its procedures; storage joined the 'energy facility' definition (HB289 2021); HB609 (2024) rewrote the siting process and SB451 (2024) added an expedited track. What died: the SEC-rules bills (HB1611 2022; HB176 2023-24), gas-facility decommissioning-cost requirements (HB1229 2020), and the fee cut (SB626 2020; HB624 2021-22, dead between the chambers with its hydro rider).

Examples: 2020 HB1146, 2020 HB1229, 2020 HB1541, 2020 SB626, 2021 HB289, 2022 HB1611

Appendix C — Roll-call votes and support

Every floor roll call recorded for policy bills in the set, from the official General Court vote database. NH decides most bills by voice vote, so a bill with no row here still had floor action. Party splits show yes–no within each party where the roster records one (‘?’ = party not on record). Votes on HB2 (Appendix H) are on the whole budget trailer.

Year	Bill	Chamber	Date	Motion	Yes	No	Yes%	By party

HIGH SUPPORT, NOT ENACTED

Bills that won a floor majority somewhere and still did not become law.

Bill	What it tried	Winning vote	What happened
2020 HB1218	Would have changed net energy metering limits for customer generators and the purchase of output of limited electrical energy producers.	House 215-125 (OTPA)	House committee recommended Inexpedient to Legislate; no final floor action recorded in the docket
2020 HB1444	Would have required the adoption of vehicle emissions standards based on the California clean car standards.	House 179-109 (OTPA)	laid on the table in the Senate; never taken back up
2020 HB1496	Would have changed the regional greenhouse gas initiative cap and trade program for controlling carbon dioxide emissions.	House 180-101 (OTPA)	laid on the table in the Senate; never taken back up
2020 HB1664	Would have created a climate action plan, an office of the environmental advocate, and an oversight commission on environmental services.	House 197-123 (OTPA)	laid on the table in the Senate; never taken back up
2020 HB466	Would have raised the customer-generator capacity cap for net metering eligibility; vetoed.	House 201-120 (Concur)	vetoed (no override action recorded as of collection)
2020 SB122	Would have redirected expenditures from the RGGI energy efficiency fund; vetoed.	House 212-140 (OTPA)	vetoed (no override action recorded as of collection)
2020 SB124	Would have raised the minimum electric renewable portfolio standards; vetoed.	House 214-141 (OTPA)	vetoed (no override action recorded as of collection)
2020 SB159	Would have raised net energy metering limits for customer-generators (the 2020 5-megawatt bill); vetoed.	House 227-128 (OTPA)	vetoed (no override action recorded as of collection)
2020 SB603	Would have changed financial assistance for biomass and forest product workers.	Senate 13-11 (Ought to Pass)	laid on the table in the House; never taken back up
2021 HB351	Would have changed the system benefits charge.	House 198-179 (OTP)	killed on the Senate floor (Inexpedient to Legislate)
2021 SB109	Would have expanded municipal host customer-generator arrangements serving political subdivisions; died on the Senate table.	Senate 24-0 (Ought to Pass w/Amendment)	laid on the table in the Senate; never taken back up
2023 HB142	Would have supported continued operation of the Burgess Biopower plant; vetoed over its above-market subsidy structure.	House 269-109 (OTPA)	vetoed (no override action recorded as of collection)
2023 HB234	Would have changed renewable energy credits.	House 177-167 (OTP)	killed on the House floor (Inexpedient to Legislate)
2023 HB251	Would have changed the cost of compliance with disclosure of electric renewable portfolio standards.	House 186-169 (OTPA)	House committee recommended Inexpedient to Legislate; no final floor action recorded in the docket

Bill	What it tried	Winning vote	What happened
2023 SB79	Would have expanded customer-generator participation in net energy metering; vetoed.	House 194-179 (OTP)	vetoed (no override action recorded as of collection)
2026 HB1542	Would have created a committee to study New Hampshire's electric renewable portfolio standard and the renewable energy fund.	House 189-157 (OTPA)	House committee recommended Inexpedient to Legislate; no final floor action recorded in the docket
2026 HB219	Would have changed the minimum electric renewable portfolio standards; interim study.	House 175-152 (OTPA)	sent to interim study by the Senate

Appendix D — Sponsors and people

Sponsors come from the official database (2025–2026, with party labels) and the OpenStates bulk sponsorship files (2020–2024); where the bulk files carry no prime flag, the first-listed sponsor is treated as prime (New Hampshire lists the prime sponsor first). Party labels exist only on the 2025–2026 layer. No judgment of any legislator is implied — these are counts of who filed what.

FREQUENT PRIMARY SPONSORS

Name	Party	Bills as prime sponsor
Michael Harrington	R	33
David Watters	D	33
Michael Vose	R	22
Kevin Avard	R	20
Rebecca McWilliams	?	17
Kat McGhee	D	15
Timothy Lang	R	11
Thomas Cormen	D	9
Howard Pearl	R	8
Martha Fuller Clark	?	7
Wendy Thomas	D	7
Jeb Bradley	?	6

Cross-party sponsor teams appeared on **41** policy bills (both major parties among named sponsors; party labels exist only for 2025–2026, so this understates).

Appendix F — What this data can and cannot say

Plain-language limits of the collected record. Anyone quoting the brief should know these.

Bill discovery is certified complete for the issue vocabulary: 2020-2024 was collected from the OpenStates bulk CSVs, a full mirror of the official docket (5,467 bills), and every bill in those five sessions was additionally swept with a wide-net energy vocabulary; all matches were either included or individually reviewed and categorized as out of scope ([certification-report.json](#)). 2025-2026 comes complete from the official state database (2,234 bills; [certification-current.json](#)). An energy bill could be absent only if its title avoids the entire wide-net vocabulary.

Bills that span a biennium (e.g. filed 2023, decided 2024) appear once per year in the annual files; first-year records are marked carryover duplicates and counted once - including 2025 HB723, which the state database keys to both years of the 2025-2026 biennium.

Sponsor names exist for nearly every bill (SQL for 2025-2026, OpenStates bulk sponsorship files for 2020-2024); party labels exist only on the 2025-2026 layer, so cross-party counts understate the true number.

NH kills most bills by voice vote or on the consent calendar; a bill with no roll call is not necessarily uncontroversial.

Committee votes appear only where a committee report recorded them (e.g. 'Vote 19-1; CC' in the docket); there is no complete committee-vote table.

Roll-call party splits use the legislators table; a few older ballots have no party on record (shown as '?').

HB2 votes are on the whole budget trailer; they are never attributable to a single energy section.

The HB2 trailer bills themselves are not in the collected set (their titles carry no energy vocabulary); their energy sections are analyzed section-by-section in the HB2 analysis (Appendix H), so the trailer's changes are not double-counted in bill totals.

The full machine-readable record — bills, votes, ballots, dockets, HB2 sections, and per-claim evidence — lives in the repository under [sources/new-hampshire/energy/](#) and [working/new-hampshire/energy/](#).

Appendix G — Bill-by-bill grid: sponsors, chamber votes, governor

One row per bill: year, number, subject, prime sponsor, each chamber’s decisive floor vote, and the Governor’s action. New Hampshire decides most bills by voice or division vote, which record no tallies — those cells say so rather than invent numbers (‘—’ means the bill never reached that chamber). Every recorded roll call, with party splits, is in Appendix C; where each bill ended is in Appendix E. Prime sponsors for 2020–2024 come from the OpenStates sponsor files; where those files carry no prime flag, the first-listed sponsor is shown (New Hampshire lists the prime sponsor first).

Year	Bill	Title/subject	Prime sponsor	House vote	Senate vote	Governor
2020	HB1116	Would have changed the definition of “eligible facility” as it pertains to renewable generation to provide fue	Lee Walker Oxenham	passed (voice/consent)	tabled (voice/division)	—
2020	HB1146	Would have changed the duties of the site evaluation committee.	Mark Vallone	killed (voice/division)	—	—
2020	HB1210	Would have created a property tax exemption for energy storage systems.	William L. Fowler	killed (voice/division)	—	—
2020	HB1215	Would have changed the installation of solar energy systems in condominiums and homeowner associations; interi	Rebecca J. McWilliams	sent to interim study (voice)	—	—

2026	SB628	Would have enabled curbside electric-vehicle charging; interim study.	David Watters	—	sent to interim study (voice)	—

Appendix H — Inside the budget trailer (HB2)

New Hampshire makes much of its energy law inside HB2, the omnibus policy bill that accompanies each two-year budget. Every extracted section of the last three trailers was screened against the energy terms and hand-reviewed; this appendix lists the sections kept (three rate sections the term matcher missed were added by hand and flagged in the working files). **All votes on HB2 are on the whole trailer, never on one section.**

HB2 2021 — LAWS OF 2021, CHAPTER 91

468 sections; 97 energy-relevant after review. Final passage (whole bill): Senate 14–10 (2021-06-24); House 198–181 (2021-06-24).

Section	What it does	Weight
91:11	Let the Department of Administrative Services suspend, for the biennium, its executive-order obligations to identify energy-efficiency projects in state facilities and to track state buildings' and vehicles' energy use, fossil-fuel consumption, and greenhouse-gas emissions.	adjacent
91:98	Extended electric rate reduction bond authority to 2027 (RSA 369-B:5): the securitization tool that let utilities refinance stranded costs - the statute later used for storm-cost and divestiture financing that ratepayers repay on their bills.	core
91:187	Created the Department of Energy (new RSA 12-P): a cabinet agency absorbing most Public Utilities Commission staff and functions plus the old Office of Strategic Initiatives' energy programs - the biggest restructuring of New Hampshire energy regulation since electric restructuring, moving policy, ratepayer advocacy support, and program administration out of the utility tribunal.	core
91:188	Let the Governor appoint an interim energy commissioner ahead of the department's full stand-up.	adjacent
91:189	The companion repeals: struck the Office of Strategic Initiatives' energy-planning statutes (including its offshore wind industry office) whose functions moved into the new department.	adjacent
91:192	Added the Department of Energy to the executive-branch organization statute.	adjacent
91:193	Established the department's unclassified leadership positions (commissioner, deputy, division directors).	adjacent
91:194	Re-established the slimmed-down Public Utilities Commission's unclassified positions after the staff transfer.	adjacent
91:200	Renamed statutory references from the old offices to the Department of Energy.	adjacent
91:201	Moved the 10-year state energy strategy and the offshore wind commission references from the Office of Strategic Initiatives to the new department.	adjacent
91:202	Moved the least-cost energy planning policy reference to the new department.	adjacent

Section	What it does	Weight
91:204	Rewrote the Public Utilities Commission itself: three full-time commissioners on staggered six-year terms, nominated through a screening process - the leaner adjudicative tribunal left after the department split.	core
91:205	Repealed the old PUC organizational provisions superseded by the rewrite.	adjacent
91:206	Barred PUC commissioners from taking employment with any utility the commission regulates for one year after leaving office - a revolving-door restriction on the state's utility regulators.	core
91:207	Set the two-commissioner quorum rule for the restructured commission.	adjacent
91:208	Let parties request that the full commission hear a case.	adjacent
91:209	Repealed superseded PUC hearing-officer provisions.	adjacent
91:210	Authorized the restructured commission's own staff (general counsel and hearings personnel).	adjacent
91:211	Kept the Office of the Consumer Advocate - the ratepayers' lawyer in utility cases - independent, administratively attached to the new Department of Energy rather than the commission.	core
91:212	Companion attachment and staffing provisions for the consumer advocate's office.	adjacent
91:213	Repealed superseded PUC staffing statutes.	adjacent
91:214	Split complaint-handling between the new department and the commission.	adjacent
91:215	Reconstituted the electric vehicle charging stations infrastructure commission's membership around the new department.	adjacent
91:216	Rewrote that commission's duties: planning the build-out of EV charging infrastructure along state corridors.	adjacent
91:217	Moved custody of funds collected under electric utility restructuring orders (rate-settlement money) to the new department's oversight.	adjacent
91:218	Moved the commercial property assessed clean energy (C-PACE) districts' technical standards from the PUC to the department - the financing tool for building-efficiency retrofits.	adjacent
91:220	Reconstituted the Energy Efficiency and Sustainable Energy (EESE) board - the standing stakeholder board on efficiency and clean-energy policy - around the new department.	adjacent
91:221	Put the new department on the state building code review board, where the energy code lives.	adjacent

Section	What it does	Weight
91:222	Reconstituted the nuclear decommissioning financing committee (the body assuring Seabrook's decommissioning money) with the new department.	adjacent
91:223	Moved the atomic-development law-and-regulation study duty to the department.	adjacent
91:224	Moved the simplified residential energy code compliance form's rulemaking to the building code review board with department input.	adjacent
91:225	Conforming reorganization of the nuclear decommissioning financing committee.	adjacent
91:226	Conforming change to decommissioning reports and public hearings for nuclear generating facilities.	adjacent
91:227	Restructured the Site Evaluation Committee - the body that approves or rejects large energy facilities like transmission lines and wind plants - shrinking it and attaching it administratively to the new department.	core
91:228	Created a study committee on further revisions to the Site Evaluation Committee - the opening move in the siting-reform fight that continued all period.	core
91:229	Moved the minimum energy efficiency standards for products (appliance standards) to the department.	adjacent
91:230	Companion reference change for the appliance efficiency standards.	adjacent
91:231	Conforming change to when gas companies (including pipeline operators) are regulated as public utilities.	adjacent
91:232	Added a department definition to the Limited Electrical Energy Producers Act - the net-metering statute's framework.	adjacent
91:233	Conforming reference change moving net energy metering administration to the department.	adjacent
91:234	Rewrote the group-host net metering rules (RSA 362-A:9, XIV): how a customer-generator hosts a group of customers and how hosts register and report - the mechanics that community solar projects run on.	core
91:235	Repealed a superseded net-metering provision.	adjacent
91:236	Conforming reference changes to the electric renewable energy classes.	adjacent
91:237	Conforming reference change to the renewable energy classes.	adjacent
91:238	Moved renewable energy certificate administration to the department.	adjacent
91:239	Moved renewable portfolio standard information collection to the department.	adjacent

Section	What it does	Weight
91:240	Rewrote the renewable energy fund statute (RSA 362-F:10): the alternative-compliance-payment money that funds rebates and low-income solar programs is continually appropriated to the new department.	core
91:241	Conforming reference changes across the renewable portfolio standard.	adjacent
91:242	Rewrote how the state charges utilities for their own regulation: the expenses of the commission and the new department are assessed against the utilities they regulate.	core
91:243	The assessment formula itself: each public utility is assessed its share of regulatory costs based on gross revenue from New Hampshire customers - the funding backbone for both agencies, which flows into rates.	core
91:244	Certification and collection mechanics for the utility assessment.	adjacent
91:245	Let utilities recover the assessment costs in rates (default service and delivery charges) - the section that passes regulatory costs to ratepayers.	adjacent
91:246	Conforming split of complaint and proceeding jurisdiction between the department and the commission.	adjacent
91:247	Rewrote who may complain against a public utility and where the complaint goes.	adjacent
91:248	Routed customer complaints to the department, with adjudication before the commission.	adjacent
91:249	Conforming change to commission proceeding rules.	adjacent
91:250	Conforming change to commission proceeding rules.	adjacent
91:251	Repealed a superseded proceedings provision.	adjacent
91:252	Assigned investigation expenses of department and commission proceedings to the utilities investigated (rate-case expense mechanics).	adjacent
91:253	Conforming change to the civil-penalty statute for utilities, enforceable through the new department.	adjacent
91:254	Moved public-utility affiliate oversight to the department.	adjacent
91:255	Conforming reference changes for utility service-equipment regulation.	adjacent
91:256	Conforming change to units-of-service rules for utility equipment.	adjacent
91:257	Conforming change assigning service-equipment oversight to the department.	adjacent
91:258	Streamlined licenses for new attachments on existing utility poles and conduits over public waters and lands (license by notification).	adjacent

Section	What it does	Weight
91:259	Companion hearing-and-order rules for those public-waters utility licenses.	adjacent
91:260	Conforming reference changes for utility property-rights proceedings.	adjacent
91:261	Conforming change to the extent of regulatory power over utilities.	adjacent
91:262	Split supervisory power over utilities between the department and the commission.	adjacent
91:263	Rewrote the general duties statute for utility oversight between the two agencies.	adjacent
91:264	Moved investigation of non-jurisdictional utilities and violation orders to the department.	adjacent
91:265	Utility reports now filed with the department.	adjacent
91:266	Companion utility reporting change.	adjacent
91:267	Moved utility service-territory jurisdiction to the department.	adjacent
91:271	Moved pole attachment regulation (the rates and terms for wires on utility poles) to the commission with department participation.	adjacent
91:272	Repealed superseded utility-regulation provisions.	adjacent
91:273	Moved utility accident investigation to the department.	adjacent
91:274	Added the department to the underground utility damage prevention (Dig Safe) law's definitions.	adjacent
91:275	Moved Dig Safe rulemaking from the commission to the department - the excavation-safety rules protecting buried gas and electric lines.	adjacent
91:276	Conforming change to Dig Safe civil penalties.	adjacent
91:278	Moved the renewable energy and energy efficiency project loan programs (business finance authority lending) to the department.	adjacent
91:279	Conforming change to the electric utility restructuring purpose statute.	adjacent
91:280	Added a department definition to the restructuring chapter.	adjacent
91:281	Amended the electric utility restructuring policy principles (RSA 374-F:3) and their implementation - the ground rules of New Hampshire's competitive electricity market, including how energy efficiency programs and the system benefits charge are administered.	core
91:282	Rewrote the restructuring chapter's ratepayer-protection provisions - who watches that restructuring savings reach customers.	core
91:283	Conforming change to the restructuring oversight committee's reporting.	adjacent
91:284	Moved competitive electricity supplier registration and regional-activities participation to the department.	adjacent

Section	What it does	Weight
91:285	Moved the offshore wind and port development commission under the new department's leadership - the state's standing body on Gulf of Maine offshore wind.	core
91:286	Renamed the office of offshore wind industry development under the department.	adjacent
91:287	Conforming definitions change for the multi-use energy data chapter (RSA 374-H).	adjacent
91:288	Turned the energy storage docket into a department investigation: how storage projects get paid for avoided transmission and distribution costs - the grid-modernization question behind peak-demand costs.	core
91:289	Conforming change to rate-fixing procedures and federal Energy Policy Act standards review.	adjacent
91:290	Conforming change to utility advertising-contract rules (RSA 378:24).	adjacent
91:291	Conforming change to rate filing, inspection, and temporary-rate procedures.	adjacent
91:292	Rewrote the multi-use energy data platform statute (RSA 378:50-52): the shared platform giving customers and competitive suppliers access to electric and gas usage data - the infrastructure that time-of-use rates and smart-meter programs depend on.	core
91:293	Moved the Regional Greenhouse Gas Initiative energy efficiency fund to the department and re-enacted how RGGI auction proceeds are used - most consumer proceeds rebated on electric bills, with a set-aside funding low-income energy efficiency programs.	core
91:451	Transferred a business-systems position into the Department of Energy.	adjacent

HB2 2023 — LAWS OF 2023, CHAPTER 79

612 sections; 20 energy-relevant after review. Final passage (whole bill): House 326–53 (2023-06-08).

Section	What it does	Weight
79:110	Amended electric utility restructuring implementation (RSA 374-F:4): how the system benefits charge's energy efficiency component is set and reviewed - the ratepayer charge that funds the NHSaves efficiency programs.	core
79:111	Conforming change to the disclosure rules for electric service energy sources and environmental characteristics.	adjacent
79:112	Amended the renewable energy fund statute (RSA 362-F:10) - the alternative-compliance-payment fund behind solar rebates and low-income clean-energy grants.	core
79:113	Conforming change to renewable portfolio standard information collection.	adjacent
79:114	Phase-in rules for existing electricity supply contract load under the renewable portfolio standard.	adjacent
79:115	Conforming change to the energy commissioner's duties.	adjacent
79:116	Moved Office of the Consumer Advocate budget provisions within the PUC statute.	adjacent
79:117	Companion consumer-advocate budget provision.	adjacent
79:118	Gave the Office of the Consumer Advocate authority to transfer funds between expenditure classes - budget flexibility for the ratepayers' advocate.	adjacent
79:119	Rewrote the public utilities assessment (RSA 363-A): how the costs of the Department of Energy and PUC are assessed against regulated utilities - the mechanics of who pays for utility regulation.	core
79:120	Certification mechanics for the utility assessment.	adjacent
79:121	Collection mechanics for the assessment.	adjacent
79:122	Exempted the smallest utilities (under \$150,000 of annual revenue) from the regulatory assessment.	adjacent
79:123	Created the Regional Energy Advocacy Fund with a \$250,000 appropriation: money for the state to advocate in regional (ISO-New England and federal) energy proceedings, where wholesale prices are actually set.	core
79:125	Restated the Department of Energy's leadership structure (commissioner, deputy, directors, general counsel).	adjacent
79:474	Legislative findings on electric vehicles: EVs pay no gas tax, so the trailer's registration-fee sections frame road funding as the issue.	adjacent

Section	What it does	Weight
79:475	Created the electric vehicle registration surcharge (RSA 261:141-b): \$100 a year for battery-electrics and \$50 for plug-in hybrids in lieu of gas taxes - the state's first EV-specific charge.	core
79:517	Appropriated \$10,000 for New Hampshire's share of the 11-state regional fisheries effort alongside offshore wind development - the state's seat at the table as Gulf of Maine wind advances.	core
79:518	Appropriated \$30,000 for three years of state membership in the Business Network for Offshore Wind - the supply-chain and industry-development side of offshore wind.	core
79:581	Ordered the Department of Energy to study a graduated, proportional low-income home energy assistance program for households that earn too much for existing fuel assistance - the benefits-cliff study on heating help.	core

HB2 2025 — LAWS OF 2025, CHAPTER 141

461 sections; 4 energy-relevant after review. Final passage (whole bill): Senate 16–8 (2025-06-26); House 184–183 (2025-06-26).

Section	What it does	Weight
141:118	Updated the Air Resources Council's industry seats - the 'steam power' seat becomes an 'electric generating industry' seat - the air-permitting council that hears power-plant permit appeals.	adjacent
141:140	Swept every uncommitted dollar of the renewable energy fund into the general fund on July 1, 2025 - a one-time raid on the fund that pays solar rebates and low-income clean-energy grants.	core
141:141	Rewrote the renewable energy fund statute so that money in the fund at the start of each budget period is diverted to the general fund before programs are funded - the ongoing version of the sweep.	core
141:142	The 2027 prospective restatement of the same renewable energy fund diversion - locking the general-fund-first rule into the statute going forward.	core

The section-by-section review (including every candidate excluded as a false keyword match, with reasons) is in [working/new-hampshire/energy/hb2-sections.md](#).

Appendix I — Sources and review notes

Reviewer-facing material: where every brief claim comes from, how the record was collected, and what to re-check. Nothing in this appendix appears in the citizen-facing brief.

SOURCE KEYS

Key	Source
S1	New Hampshire General Court public SQL database (NHLegislatureDB): <code>rollcallsummary</code> / <code>rollcallhistory</code> (all years), <code>legislation</code> , <code>legislationtext</code> , <code>sponsors</code> , <code>docket</code> (2025–2026 biennium)
S2	gc.nh.gov official bill texts: HB2 2021 chaptered final (Chapter 91)
S3	Legislative Budget Assistant chapter-law PDF for HB2 2023 (Laws of 2023, Chapter 79); SQL <code>legislationtext</code> for HB2 2025 (Chapter 141)
S4	OpenStates bulk session CSVs (complete per-session mirrors of the official GenCourt docket, 2020–2024; committed under <code>sources/new-hampshire/_bulk/</code>) — bill lists, sponsors, actions, votes
S5	Derived working files in this repository: <code>evidence-pack.json</code> , <code>curation-map.json</code> , <code>dispositions.json</code> , <code>hb2-sections.json</code> , <code>certification-report.json</code> , <code>certification-current.json</code> (all fact-checked layers over S1–S4)
S6	GenCourt legacy bill-status archive (<code>bill_docket.aspx</code> by LSR) and the official House Journals (<code>calendars_journals</code> viewer) — used for the two hand-researched docket-mirror gaps

CLAIM-TO-SOURCE MAP (BRIEF)

Brief claim	Source
375 energy bills; 103 became law; 38 laws in 2025–2026	S5 counts over S1/S4 (discovery, dockets) — <code>evidence-pack.json</code> inventory
28 core energy sections in the last three trailers; the trailer contents (Department of Energy 91:187, PUC rebuild 91:204/91:206, consumer advocate 91:211, utility assessments 91:243–245, rate reduction bonds to 2027 91:98, group-host net metering 91:234, renewable energy fund 91:240, RGGI fund 91:293, offshore wind office 91:285–286, energy data platform 91:292, utility assessment rewrite 79:119–122, EV surcharge 79:475, Regional Energy Advocacy Fund 79:123, fuel-assistance cliff study 79:581, renewable-fund sweep and diversion 141:140–142)	S2/S3 HB2 texts — curated in <code>hb2-sections.json</code> ; Appendix H
HB2 2025 passed the House 184–183 (Senate 16–8); HB2 2021 House 198–181, Senate 14–10; HB2 2023 House concur 326–53	S1 roll calls (<code>hb2/{year}/hb2-votes.json</code>)
The 7 vetoes and their override tallies (SB159 227–128 then 207–130; HB466 201–120 then 199–139; SB124 214–141 then Senate 14–10; SB122 212–140 then Senate 14–10; HB142 269–109 then 194–159; SB79 194–179 then 0–23; HB221 no override action recorded as of collection)	S1 roll calls; S1/S4 dockets (“Vetoed by Governor”)
Died-between-chambers bills (HB342 concurrence failed 154–195 then House non-concur by voice; HB710; SB78; HB624)	S1 roll calls + S1/S4 dockets; HB342’s non-concur row hand-staged (<code>manual-resolutions.json</code> — the docket spells it “Non-Concurs”)
Proven-support votes (SB109 Senate 24–0 three times, then tabled; HB351 House 198–179; HB1218 House 215–125; HB1542 189–157; HB219 175–152; SB603 Senate 13–11; HB1496 House 180–101)	S1 roll calls + dockets

Brief claim	Source
HR16 (2022) unanimous 21–0 committee report and consent-calendar adoption	S6: GenCourt archive docket (LSR 2317, “Committee Report: Ought to Pass HR0016 (Vote 21-0; CC)”) + House Journal No. 3, 02/16/2022 (consent calendar and Third Reading/Final Passage) — labeled as a committee vote; the floor row is a documented GenCourt docket-mirror gap
2025–2026 law votes (HB1775 House 198–153; HB682 206–163; HB690 200–155; HB672 concur 185–151; SB4 Senate 23–0; HB723 201–160 on the carryover record)	S1 roll calls
Efficiency-settlement votes (HB549 House 343–0; HB2023 Senate 23–0 on the remainder; SB269 interim study 182–152; HB96 tabled 199–135)	S1 roll calls
Net-metering and aggregation votes (SB228 killed 190–151; SB449 killed 181–158; SB106 postponed 172–152; HB1402 interim study 188–148)	S1 roll calls
TOU/data-layer votes (HB631 killed 192–180) and climate votes (HR17 adopted 178–159; HB524 OTP failed 181–186; HCR4 adopted 195–149)	S1 roll calls
Rate/EV votes (HB504 204–165; HB189 206–148; HB1623 184–168; SB272 killed 195–163)	S1 roll calls
38 laws of 2025–2026 listed in “Already law”	S1 dockets (“Signed by Governor ... Chapter N”)
“1 of 5 citizen proposals already substantially law” (community power: HB315 2021, SB265 2022, HB385 2023, HB1600 2024, SB590 and HB1742 2026)	S1/S4 dockets; grid proposal list in config/issues/new-hampshire-energy.yaml
Sponsor counts and 41 cross-party bills	S1 sponsors (2025–2026) + S4 bulk sponsorships (2020–2024) — evidence-pack.json people signals
Federal overlap statements (FERC/ISO-New England wholesale markets, interstate transmission and pipeline licensing, NRC licensing and nuclear waste, Gulf of Maine offshore leasing, LIHEAP, the federal Weatherization Assistance Program, clean-energy tax credits, RGGI as an interstate program)	Descriptive statements of federal law and programs; the NH bills cited (HR15 2025, HR16 2022, HCR4 2025, HB690 2025, SB102 2023) are in the pack
“Geothermal has never had a New Hampshire bill in either universe”	Both certification sweeps: the word-bounded wide net (incl. geothermal) over all 5,467 + 2,234 titles returned zero geothermal bills; the term also scored zero in calibration

COMPLETENESS CERTIFICATION (2020–2024 AND 2025–2026)

The five OpenStates bulk session archives are complete mirrors of the official docket: 5,467 bills. [working/.../certify-universe.py](#) verified that (1) every collected 2020–2024 bill exists in that universe (zero ghosts), (2) no bill in the set is missing votes the mirror knows about (zero bulk-vote/SQL mismatches), and (3) every one of the 5,467 titles was swept with a 51-pattern wide-net energy vocabulary far broader than the issue’s search terms — bare energy/electric/utilit stems, word-bounded wind/oil/gas/meter/power, renewable, solar, fuel, pipeline, kilowatt, megawatt, thermal, hydro, weatherization, RGGI, Eversource, grid, ratepayer, nuclear, reactor, turbine, and the rest. All 17 wide-net matches not already in the set were reviewed by hand: 3 were added (tagged [supplement:universe-certification](#) — 2021 SB109’s municipal host customer generators, 2020 SB256’s emergency generators, and 2020 SB429’s plastic-to-oil study, none of whose titles carry an energy/electric word) and 14 were excluded with per-bill categories (government powers, ‘generation’ false positives, tear gas, waste generators, hydrology, coal grading, heating- trade licensing) recorded in [working/.../certification-report.json](#) and summarized in [certification-report.md](#). A 2020–2024 energy bill could be absent from this record only if its title avoids that entire vocabulary.

The same net was then applied to the complete current biennium ([certify-current-biennium.py](#)): all 2,234 bills in the official SQL legislation table for 2025–2026 were swept, 1 real miss was added (tagged [supplement:universe-certification-current](#) — 2025 SB228, “limitations on community customer generators”, again with no energy word in the title), and 13 candidates were excluded with categories in [certification-current.json](#) / [certification-current.md](#). Two docket-mirror gaps are documented and hand-researched with citations in [manual-resolutions.json](#): 2022 HR16, whose floor adoption GenCourt’s own docket omits (resolved from House Journal No. 3, February 16, 2022), and 2020 HB1355, which passed the House and died in a Senate committee when the COVID-truncated session ended.

COLLECTION AND REVIEW NOTES

Votes come exclusively from the state's [rolldatasummary](#) table; where the brief cites a committee tally, it is quoted from the official docket text and labeled as such (one instance — HR16's 21–0 — whitelisted in [scan-lege-brief.py](#) with its docket citation).

Dispositions are docket-derived for all 460 bills, zero unresolved; four manual resolutions carry citations ([manual-resolutions.json](#)): the HR16 journal adoption, HB1355's COVID-session death, 2025 HB342's "Non-Concurs" spelling the classifier's pattern misses, and 2025 HB723, which the state database keys to BOTH years of the biennium with identical dockets — counted once, in 2026, per the carryover rule.

Biennium carryovers (38 first-year records) are counted once, in their decision year, after verifying terminal actions in the first-year docket.

HB2 votes are on the whole trailer and are never attributed to a section.

The overlap rule with the sibling packets is documented in [build-curation.py](#): the utility-property-tax / SWEPT-on-generators bills (HB696, SB277, and the assessing-power-generation commissions) appear in BOTH the property-taxes packet and this one, each from its own angle; the ratepayer-charge bills that packet excluded as utility regulation are core here, and the energy sections the sibling HB2 analyses excluded are this packet's Appendix H core.

The automated review gates: [scan-lege-brief.py](#) (advice language, cited bills, vote pairs) and [fact-check-reality-map.py](#) (every reality-map claim against the evidence pack) — both PASS on the shipped revision.
